PLENTY FOOD -- PLENTY DUCKS! NO FOOD -- NO DUCKS!

That's the story we hear this fall. If you want more Ducks, plant their favorite foods NOW. We suggest the following Legal, Natural Duck Foods for Planting NOW (in November):

1. GIANT WILD RICE SEED - No. 1 Duck Food In Minnesota and Lake States. For sheltered, hard waters (waters where snails or shells live), not over 2 ft. deep, with outlet. Short seed crop - order now. Sow 2 Bu. per Acre.
2. WILD CELERY SEED - For hard, clear, fresh or slightly brackish water over 2 ft. deep. Only 300 Lbs. left. Sow 30 Lbs. per Acre.
3. COONTAIL PLANTS - For fairly clear, sheltered, fresh or slightly brackish, hard or soft water. Quick-growing - makes food at once. Sow 12 Bu. per Acre.
4. ELODEA PLANTS - Grows abundantly in hard, clear, fresh water. Recommended by "Ducks Unlimited" as carp-resistant. Sow 10 Bu. per Acre.

\* NOTE - Don't plant Coontail or Elodea unless you want lots of duck food.

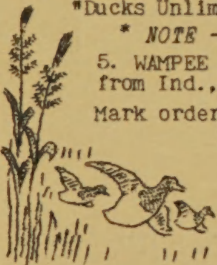

5. WAMPEE (Duck Corn) SEED - For neutral or acid swamps and shallow water from Ind., Mich., East and South to Coast. Sow 10 Lbs. per Acre.

Mark order form and pricelist on other side. Mail now and we'll hurry your supply of duck food along with planting directions.
